

Wound Measuring Guide

Wound
Management Aid

The disposable wound measuring guide provides a convenient and economical way to document and monitor wound healing.

The single use, disposable measuring guide enables convenient and effective measurement of dermatological wound sites such as skin lesions, pressure sores, stomas, wounds and incisions while eliminating cross contamination. Accurate documentation of wound length, width and diameter is now made easy and economical with dual scale ruler templates. Compliant 2 mil plastic conforms to curved surfaces for greater accuracy. Packed in a convenient dispenser box.
